

**AMENDMENTS TO THE SPECIFICATION WITH MARKINGS TO SHOW CHANGES
MADE**

Amend the following paragraphs:

[0038] -- Fig. 4 shows a third sewer pipe according to the invention in a cross section, ~~and~~---

[0039] Fig. 5 shows a fourth sewer pipe according to the invention in a perspective view, and

[0039.1] Fig. 6 shows schematically an arrangement of two sewer pipes and a boring device.---

[0041] --The partial pipe shell 1 has a recess 6 at the end. An elevation 7 is provided at the opposite end of the partial pipe shell. The recess 6 is suitable to accommodate the elevation 7 of a further partial pipe shell or a boring device and, after the partial pipe shells have been put together, to produce a connection transmitting tensile force between the two sewer pipes or between the sewer pipe and the boring device. FIG. 6 shows schematically by way of example an arrangement of two sewer pipes 40a, 40b connected in accordance with the present invention, and a boring device 50 connected to the sewer pipe 40 in accordance with the present invention .---
